16. Northern Harrier	1	32. Marsh Wren	17				

## \*NOTES\*

- \*1 There could have been two Harriers, but not confirmed. Two females are roosting in the tall grass at the mid meadows, and shortly after one flew off site, one flushed up from a ground perch in the roosting area, just N. of service road.
- \*2 An adult male was on the snag at the constructed wetlands, as viewed by all from the E. mound, or "the grassy knoll".
- \*3 All four resident adults were on their NE and SW territories.
- \*4 A SY (second year) juvenile male on the mid meadow snag.
- \*5 Flushed up from area 200 ft north of the far south trail tower.
- \*6 Flying over north ditch toward the K.O.A. camp ground.
- \*7 Found near top of the fourth pine counting from the north..
- \*8 Single swallow hunting low over the lagoon, and seen by all
- \*9 Spotted by Steve at the nursery road in the tall near conifer.
